

# MULTIROUTE PROOF OF DELIVERY

MultiRoute POD enhances your delivery services with end-to-end planning, automated dispatch and real-time tracking. Manage business operations with managers dashboards, interactive maps, notifications and more!

Ask about the Pre-Sales, Direct Store Delivery, Merchandising and multiCommerce modules to get the full MultiRoute experience.

## It supports integration to multiple ERPs including:

## INCREASE EFFICIENCY

Eliminate manual data entry and automate delivery processes. Minimize your delivery route optimization time, allowing managers to quickly organize the route and spend more time with operations.

## INCREASE DELIVERY CAPACITY

Reduce invoice processing time by eliminating manual entries, allowing to spend more time with customers. Keep your delivery personnel focused on the tasks at hand by organizing route efficiently.

## IMPROVE CUSTOMER SERVICE

Automate notifications of delivery route, informing your client of the estimated time of arrival beforehand so they can be ready to receive their delivery.

## BENEFITS

### REDUCED PAPERWORK

View inventory information right on the mobile device and collect electronic signatures. Send invoices & receipts via automated emails. Take pictures and store them in the cloud.

### TRANSACTION TRACING

Reduce invoice processing time by eliminating manual entries, allowing to spend more time with customers. Keep your delivery personnel focused on the tasks at hand by organizing route efficiently. Increase Efficiency
